Subject Index to Volume 15

Accommodation	Observations on the intraocular changes associated with accommodation. An experimental study using radiographic technique (*Suzuki*)	171
Anatomy	Schemes of the serial frontal sections of the orbit and its contents (*Nakagawa*)	152
Biochemistry	Development of the acid mucopolysaccharides in the human embryonic cornea (*Murakami et al.*)	44
	Ultrastructural localization of acetylcholinesterase activity in unmyelinated nerve fibers of oculomotor, trochlear and abducens nerve trunks in cat and rat (*Tanishima*)	52
	Ontogenic studies of lactate dehydrogenase isozymes in human and chicken eye tissues (*Yamaguchi et al.*)	99
Bacteriology	Anaerobes in the bacterial flora of the conjunctival sac (*Matsuura*)	116
Circulation, ocular	Studies on ocular photoelectric plethysmogram (*Kogure et al.*)	109
	Blood supply in the vicinity of ocular motor nuclei (*Fujino*)	
Color vision	Classification of dyschromat by degree using the anomaloscope with neutral density filters (*Iinuma*)	163
Conjunctiva	Anaerobes in the bacterial flora of the conjunctival sac (*Matsuura*)	116
Cornea	Development of the acid mucopolysaccharides in the human embryonic cornea (*Murakami et al.*)	44
	In vivo determination of the corneal permeability (*Mishima et al.*)	183
	Electron-microscopic study on the cornea. II. Electron-microscopic observation of Arthus phenomenon in the cornea (*Yamagami*)	191
Electron microscopy	Pores of the trabecular wall of Schlemm's canal: Ferritin perfusion in enucleated human eyes (*Segawa*)	1
	Morphological study on the permeability of the blood-aqueous barrier (*Shiose*)	17
	The muscles of the pigeon iris. A study by electron microscopy and fluorescence histochemistry	

	(*Takahashi*)	27
	Ultrastructural localization of acetylcholinesterase activity in unmyelinated nerve fivers of oculomotor, trochlear and abducens nerve trunks in cat and rat (*Tanishima*)	52
	Ultrastructural changes of the melanocyte in Vogt-Koyanagi-Harada syndrome and sympathetic ophthalmia (*Matsuda et al.*)	69
	Sympathetic ophthalmia. A comparative fluorographic and electronmicroscopic study (*Segawa et al.*)	81
	The histology and ultrastructure of arteriosclerosis in the human retina (*Kimura*)	88
	Electron-microscopic study on the cornea. II. Electron-microscopic observation of Arthus phenomenon in the cornea (*Yamagami*)	191
	Concerning the giant vacules of the trabecular wall of Schlemm's canal (*Segawa*)	205
	Retinoblastoma and iris neovascularization —A light- and electron microscopic study— (*Cheng-Minoda*)	215
	Fine structure of the digested retinal vessels (*Fukuda et al.*)	223
Electroretinography	Macular ERG in central serous retinopathy (*Nagata et al.*)	9
Fluorography	Sympathetic ophthalmia. A comparative fluorographic and electronmicroscopic study (*Segawa et al.*)	81
	Histologic study on the location of sodium fluorescein in the fundus (*Tsukahara et al.*)	125
	A fluorescein angiographic study on microangiopathia sulfocarbonica (*Hotta et al.*)	
Histochemistry	Development of the acid mucopolysaccharides in the human embryonic cornea (*Murakami et al.*)	
	Ultrastructural localization of acetylcholineste... unmyelinated nerve fibers of oculomotor, tr... abducens nerve trunks in cat and ra...	
	Histologic study on the location of ... the fundus (*Tsukahara et al.*)	
Histology	Morphological study on the permeability of the ... aqueous barrier (*Shiose*)	
	The muscles of the pigeon iris. A study by electron mi...	

	scopy and fluorescence histochemistry (*Takahashi*)	27
	Development of the acid mucopolysaccharides in the human embryonic cornea (*Murakami et al.*)	44
	The histology and ultrastructure of arteriosclerosis in the human retina (*Kimura*)	88
	Histologic study on the location of sodium fluorescein in the fundus (*Tsukahara et al.*)	125
	Histological studies on arteriolar sclerosis in the human retina. The localization of acid mucopolysaccharides in the walls of the central retinal artery as well as other arteries (*Hamai*)	140
	Retinoblastoma and iris neovascularization —A light- and electron microscopic study— (*Cheng-Minoda*)	215
Injury, Ocular	Eye injury by organic phosphorous insecticides (Preliminary report) (*Ishikawa*)	60
Iris	Morphological study on the permeability of the blood-aqueous barrier (*Shiose*)	17
	The muscles of the pigeon iris. A study by electron microscopy and fluorescence histochemistry (*Takahashi*)	27
	Retinoblastoma and iris neovascularization —A light- and electron microscopic study— (*Cheng-Minoda*)	215
Nerve	Ultrastructural localization of acetylcholinesterase activity in unmyelinated nerve fibers of oculomotor, trochlear and abducens nerve trunks in cat and rat (*Tanishima*)	52
	Blood supply in the vicinity of ocular motor nuclei (*Fujino*)	
	Schemes of the serial frontal sections of the orbit and its contents (*Nakagawa*)	152
	Pores of the trabecular wall of Schlemm's canal: Ferritin perfusion in enucleated human eyes (*Segawa*)	1
	[illegible]phological study on the permeability of the blood-[illegible]s barrier (*Shiose*)	17
	[illegible] determination of the corneal permeability (*Mishima et al.*)	183
	Macular ERG in central serous retinopathy (*Nagata et al.*)	9
	The histology and ultrastructure of arteriosclerosis in the human retina (*Kimura*)	88

	Histologic study on the location of sodium fluorescein in the fundus (*Tsukahara et al.*)	125
	A fluorescein angiographic study on microangiopathia sulfocarbonica (*Hotta et al.*)	132
	Histological studies on arteriolar sclerosis in the human retina. The localization of acid mucopolysaccharides in the walls of the central retinal artery as well as other arteries (*Hamai*)	140
	Retinoblastoma and iris neovascularization —A light- and electron microscopic study— (*Cheng-Minoda*)	215
	Fine structure of the digestered retinal vessels (*Fukuda et al.*)	223
Schlemm's canal	Pores of the trabecular wall of Schlemm's canal: Ferritin perfusion in enucleated human eyes (*Segawa*)	1
	Concerning the giant vacules of the tarbecular wall of Schlemm's canal (*Segawa*)	205
Toxicology	Eye injury by organic phosphorous insecticides (Preliminary report) (*Ishikawa*)	60
	A fluorescein angiographic study on microangiopathia sulfocarbonica (*Hotta et al.*)	132
Uveitis	Ultrastructural changes of the melanocyte in Vogt-Koyanagi-Harada syndrome and sympathetic ophthalmia (*Matsuda et al.*)	69
	Sympathetic ophthalmia. A comparative fluorographic and electronmicroscopic study (*Segawa et al.*)	81

Index of Authors to Volume 15

A ASATANI Hiromasa: see KOGURE 109

C Cheng-MINODA Kensei: Retinoblastoma and iris neovascularization —A light- and electron microscopic study— 215

F FUJINO Tadashi: Blood supply in the vicinity of ocular motor nuclei 238

FUKUDA Masatoshi: Fine structure of the digested retinal vessels 223

G GOTO Shigeru: see HOTTA 132

H HAMADA Minoru: see YAMAGUCHI 99

HAMAI Yasuna: Histological studies on arteriolar sclerosis in the human retina. The localization of acid mucopolysaccharides in the walls of the central retinal artery as well as other arteries 140

HATTORI Eiji: see MISHIMA 183

HONDA Yoshihito: see NAGATA 9

HOTTA Reiji: A fluorescein angiographic study on microangiopathia sulfocarbonia 132

I IINUMA Iwao: Classification of dyschromat by degree using the anomaloscope with neutral density filters 163

ISHIKAWA Satoshi: Eye injury by organic phosphorous insecticides (Preliminary report) 60

IYODA Tadashi: see FUKUDA
